**TITLE:ICAM50x WINDOWS TIME SETTING TOOL  
RELEASE NOTE**

**Our Reference:** 333480  
**Contact:** Ben Seaby  
**Date:** 28/02/2014

**Introduction**

The iCAM50x internal clock may be set in Windows XP using the 'properties' tab of the device as described in the product manual. It is compatible with all Extronics iCAM50x and iCAM50x devices.

However, with Windows Vista and Windows 7, this feature is not available. Extronics therefore have produced the iCAM50x Windows Time Setting Tool. This is a simple stand-alone application compatible with Windows XP, Windows Vista and Windows 7.

Extronics hereby certify that the iCAM50x Windows Time Setting Tool has been scanned with the current version of Trend Antivirus and is virus and malware free.

This version contains a bug fix for an issue where the day of the week was not displayed correctly for 2014. The MD5 checksum for the zip file is 6f59319d2560485d6c1e1726f861b21c

**Installation**

**Please note that you may require administrative rights on your computer to install and run this program. If in doubt, please consult your IT support service.**

- In Windows XP/Vista/7, double click on the 'iCAM50x Windows Time Setting Tool.zip' file. This will open the zip file containing the program.
- Simply drag or copy the 'iCAM50x Windows Time Setting Tool.exe' file to your windows desktop or other convenient location.

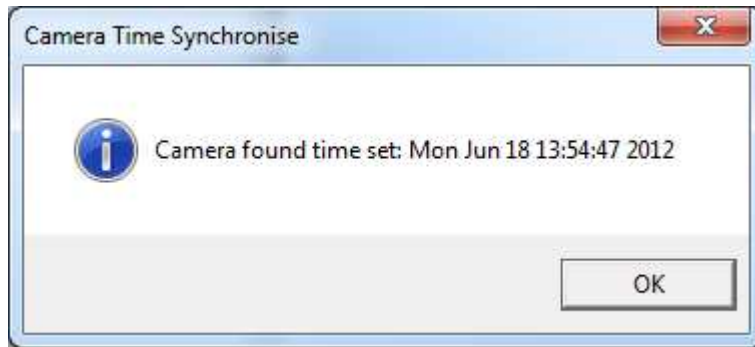

**Usage**

To use the iCAM50x Time Setting Tool, simply follow these instructions:

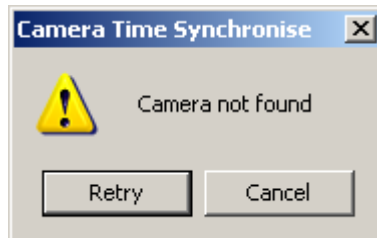

1. Switch on your iCAM50x in the normal manner
2. Connect your iCAM50x USB port to your PC, set in normal operating mode (the same mode as used for downloading pictures).
3. Double-click on the iCAM50x Time Setting Tool application
4. If the application can successfully connect to your camera, the following window will appear:

5. Press the 'Yes' button
6. If the time setting was successful the following should appear:

7. If the time setting process fails, the following will appear. Reconnect the iCAM50x and try again. If the process is still unsuccessful, reboot the iCAM50x, and also check that you are able to download pictures from the camera per the instructions in the user manual.
